Educational Resources Summer Programs for Undergraduates

If you excel at mathematics, computer sciences and biology, and are ready to be challenged in the area of Biostatistics and Bioinformatics, we have the ideal training program for you! Learn how to apply methods to answer important questions in health and biology, while spending the summer on the beautiful and renowned University of Wisconsin campus located on the shores of Lake Mendota.

The Department of Biostatistics and Medical Informatics conducts two complementary summer programs for undergraduates majoring in the quantitative sciences

Computational Biology and Biostatistics Summer Research Program (CBB)

is a federally funded 8-week program to prepare 6-8 students from groups who are traditionally under-represented in graduate education for graduate studies in biostatistics and bioinformatics. The focus of the CBB is a mentored research project.

Summer Institute for Training in Biostatistics (SIBS)

is a federally funded program to introduce 20 undergraduate students to the field of biostatistics through 6 weeks of comprehensive coursework/training. Students learn basic concepts of biostatistics and gain hands-on experience working with real data collected in major clinical research studies.
