

Announcements 3/15

- Read Li et al. (2010)
 - RSEM
- Optionally read Wang et al. (2009) and Conesa et al. (2016)
 - RNA-Seq overviews
- Project proposals due March 22
- HW3 will be released on March 22

Announcements 3/15

- Project ideas and proposal guidelines now available on the course website
 - Convince me the project is feasible and in scope
- Individual projects
- Project ideas from 2015-2017 still applicable

Announcements 3/15

- Example projects
 - Apply one or more methods to a specific biological dataset of interest, focus on interpreting results
 - Benchmark multiple algorithms on multiple datasets and draw conclusions
 - Implement a new algorithm or extend an existing method
 - Create a GenomeSpace recipe to make a bioinformatics workflow more accessible
- Project can relate to your own research
 - Very clearly differentiate the scope of the project from your existing research
