Bioinformatician (2) at the University of Wisconsin-Madison

The Department of Biostatistics & Medical Informatics (BMI), Bioinformatics Resource Center (BRC), and Carbone Cancer Center (UWCCC) at the University of Wisconsin-Madison seek applicants for the post of Bioinformatician. PhD required in computer science, statistics, bioinformatics, or a closely related field. We are especially interested in individuals with expertise in the analysis of high throughput biological sequence data and other molecular data types. Experience with cancer research, machine learning, and/or clinical data are also positives. Two positions are available, one at the Assistant Scientist level and one at the Associate Scientist level (requires 5-7 years experience).

The successful hires will collaborate with UWCCC members and will provide data analysis and consultation for their research projects. These individuals will be capable of working independently and working effectively with collaborators and possess the ability to effectively troubleshoot and develop custom scripts and workflows. The Bioinformatician will be housed in the BRC, which is part of the UW Biotechnology Center, and will be an academic staff member of the BMI Department and will be mentored by world-class faculty in the department.

Application deadline is August 26, 2015. Applicants should go to
and
for complete descriptions of each position and electronic application directions.

UW-Madison is an equal opportunity/affirmative action employer.
We promote excellence through diversity and encourage all qualified individuals to apply.
